Massage Therapy from Around the Globe

Thai Massage combines gentle and strong stretches and is often likened to a basic form of Yoga. The movements use muscle compression, joint mobilisation and acupressure of the muscles, tendons, pressure points and energy lines, to leave you feeling refreshed and energised.

Swedish Massage is one of the best-known bodywork techniques. It aims to relax the entire body and improve the circulation of blood and lymph by using a specific set of massage movements: effleurage (sliding movements); petrissage (kneading movements); friction or rubbing; and vibration and percussion. During a traditional Swedish massage, the therapist will also use passive and active joint movements, stretching and bending the joints.

Deep Tissue Massage focuses on stretching the fascia, the web of connective tissue that surrounds, supports and accesses all of the body's muscles, bones, nerves and organs. Working layer by layer, through the connective tissue and muscles into the deepest accessible layers, this massage technique helps to correct posture and increase your freedom of movement.
